Aims and objectives

What do you wish to achieve by providing regulated activities?

How will your service help the people who use your services?

Please use the numbered bullet points:

1. To provide the highest quality NHS general medical services available under the NHS
2. To ensure that patients are seen by the most appropriate healthcare professional as quickly as possible as dependant upon their presenting complaint
3. To focus on prevention of disease by promoting good health and prophylactic medicine
4. To provide patients with an experience and environment that is comfortable, friendly, professional and relaxing
5. To understand and meet the needs of our patients, involve them in decisions about their care and encourage them to participate fully
6. To involve other professionals in the care of our patients where this is in the patient's best interests; for example, referral for specialist care and advice
7. To ensure that all members of our team have the right skills and training to carry out their duties competently
8. To continuously improve the lines of communication to patients using the latest technologies as appropriate
9. To develop new ways to educate and inform patients in order to encourage patients to be pro-active in their health and wellbeing

1. The Aims & Objectives of the Establishment

To provide a means for the general public to receive medical consultation, examination and diagnosis by a General Medical Practitioner, Practice Nurse, HealthCare Assistant and other associated health services including, but not limited to, Midwifery, Phlebotomy and Drug Team liaison at the surgery location.

The service is to be provided in courteous, peaceful, practical, professional and comfortable surroundings, which cover all Health & Safety and Infection Control requirements. The Practice will aim to provide the best possible healthcare within the scope of the NHS. It will be free at the point of use for the vast majority of services, however, any charges for services not covered by the NHS, will be made clear to the patient in advance of those services being carried out.

The Practice will strive to maintain patient equality at all times and all fully registered patients will be afforded the same level of service regardless of age, sex, disability, sexual preference, ethnicity, nationality or religious beliefs.

The Practice will strive to provide the very best in general medical services and prides itself on being a whole person centred diagnostic and management service. Our services will include, but are not necessarily limited to, disease prevention, health promotion, management of acute and chronic illnesses, routine immunisations and travel health, family planning, cervical smears, ante-natal and post-natal care.

In order to provide the best possible healthcare, we need support from our patients, whereby they take responsibility for their own health. The Practice will continuously look at ways and means in order to enable them to do this, by educating and informing patients through our website as well as other lines of communication. The Practice will continue to look at ways in which it can become more efficient without compromising on quality, however, patient support is needed to help us to achieve this.

The spiritual, social, psychological and physical aspects of each person are fully considered. The Practice seeks to meet the needs of people to understand and know about their own bodies, sharing the responsibility of each patient's healthcare equally. It achieves this by allowing patients time in a comfortable environment with a person who is knowledgeable and can help them in most areas of their medical requirements. If the Practice is not able to provide the expertise required on site, it will make referrals to the appropriate healthcare professionals in order to help the patient.

The Practice will offer a wide range of appointment times from early morning to late evening, Monday to Friday. St Helens Rota Out of Hours Service is responsible for the Practice Patients outside of these hours, but a duty GP from the surgery will be available in case of emergency.

Emergency Equipment which includes a defibrillator, provision of oxygen, nebulisers and emergency medications will be maintained.

The Practice will remain fully computerised and ensure that all clinicians have full access to all patients' notes as required.

Staff performance is constantly monitored with daily contact with our Manager and yearly appraisals. We identify training needs and ensure that all staff have the skills and knowledge required to perform their duties to the highest possible standard.

We will also maintain compliance with all legislative, industry and professional requirements.

2. The Name and Address of the Registered Provider

The name and address of the registered provider is Dr Jean Margaret Sutton, Cornerstone Surgery, Fingerpost Park Health Centre, Atlas Street, St Helens, Merseyside, WA9 1LN and she is a member of the Medical Defence Union.

3. The Relevant Qualifications and Experience of the Registered Provider

The relevant qualifications and experience of Dr Jean Margaret Sutton are as follows:

Dr Jean Margaret Sutton has all the credentials required for the management of a General Practice. She has been an NHS partner for 17 years and worked in hospital for 3 years post graduation.

Dr Sutton is a member of the General Medical Council, GMC No. 3341757

4. The Relevant Qualifications and Experience of the Staff working in the Establishment, or for the purposes of the Agency

Locum doctors may be asked to work on a self employed basis for the purposes of the Practice. Such doctors will be required to produce evidence of their CV, full qualification and registration of societies, medical indemnity insurance, General Medical Council certificates, Hepatitis B status and references where appropriate.

Where doctors or nurses are NOT in an NHS/Private employee status, their CRB status will be required.

5. The Organisational Structure of the Establishment

Cornerstone Surgery has two Partners. They are Dr Jean Margaret Sutton and Dr Karl Franz Consiglio. The Practice operates routinely from 8.00 am to 6.30 pm on week days, but does, however, hold weekly late night surgeries until 8.00 pm on Tuesdays. Early morning and late evening appointments are available to all patients who are registered with us.

Chris Cunliffe currently manages the Practice and the employees report directly to her.

Philip Matthews is the IM&T Manager and is responsible for all aspects of IM&T, and Information Governance issues are referred, in the first instance, to him.

The Practice has one Practice Nurse, one Health Care Assistant, one Administrator, one Summariser, two Scanning Clerks and five Receptionists

Most blood tests and all x-rays are usually referred to outside accredited laboratories, however, some exceptions, such as in-house Warfarin testing, exist

6. Practice Profile

The Practice is located in a very deprived area of the Borough of St Helens. We have 2689 (February 2013) patients in total.

[Practice Profile](#) (PDF, 154 Kb)

7. The kinds of treatment and any other services that are provided by General Practice Services

- Routine and urgent appointments with a healthcare professional
- Repeat prescriptions
- Management of chronic health conditions, including but not limited to Diabetes, Asthma, Coronary Heart Disease, Stroke, Hypertension, Chronic Obstructive Pulmonary Disease, Mental Illness and Epilepsy.
- Immunisations e.g. routine, childhood and travel immunisations
- Health screening

8. The Facilities which are available for the benefit of patients

Ease of access to see a healthcare professional. We have early morning and evening appointments available

A very pleasant, comfortable and clean environment is provided

There are comfortable waiting areas where the patients can sit and relax whilst waiting to see the healthcare professional

Limited free parking is available on site and there is adequate access for disabled visitors

The Practice has equipment to aid diagnosis such as sphygmomanometers, eye charts, otoscopes, oroscopes and urinalysis, as well as emergency equipment in the form of a defibrillator, provision of oxygen and emergency medications. Facilities for Spirometry and Warfarin testing are also available.

The Practice is fully computerised.

9. Arrangements made for consultation with patients about the operation of Cornerstone Surgery

During registration, the Practice leaflet is given to each patient and this clearly outlines the working practices of the surgery.

Patients who wish to view their medical records, must make a written request to do so.

The Practice does not have any in-patients and no arrangements need to be made for contact between in-patients and their relatives, friends and representatives.

10. Arrangements for dealing with complaints

This Practice operates a procedure for the investigation of complaints.

Making a complaint to the Practice in no way prejudices the right to complain to PALS, should a complaint not be resolved to a satisfactory level.

Chris Cunliffe, Practice Manager manages the complaints procedure on behalf of the Practice.

A complaint should be submitted as soon as possible after the event giving rise to the complaint. The Practice will then ensure that all relevant details are recorded and arrange for the complaint to be investigated.

The Practice will acknowledge receipt of a complaint within 7 days and aim to report back within 28 days. If this is not possible the reason for the delay will be explained to and a revised date will be given for the completion of the investigation.

If, following the Practice's explanation the complaint is not resolved there is still a right to complain to PALS.

PALS complaints procedure leaflets will be available to all registered patients. This is available for complaints which cannot be settled within the Practice.

To confirm GMC registration or any of our medical staff you can contact The General Medical Council on 0207 9153630 or e-mail registrationhelp@gmc-uk.org

11. Arrangements for respecting the privacy and dignity of patients

The consulting rooms are completely segregated away from the Reception area.

Patients are interviewed on a one-to-one basis in the surgery setting. The whole ambience is of relaxation and comfort. The examination couch is fully screened. The windows have full blinds and complete confidentiality is retained. Great respect is given to the dignity of each patient. If the patient wishes, it would be possible to have a chaperone. Patients will not be examined without their full consent.

For those patients who do not speak English, consent has to be obtained via a third party, who is usually a family member, and who can translate. Alternatively, Language Line can be used.

12. Confidentiality

Everyone working for Cornerstone Surgery must keep information about patients confidential, so that the patient can feel able to talk to anyone in the Practice freely. Also by law, we must protect information about you.

All staff at Cornerstone Surgery have signed a confidentiality agreement

The Practice can supply information to other people or organisations only:

- with the Patient consent, or
- in accordance with the principles of medical confidentiality here described.

This does not apply if the Patient cannot be identified from the information. There are strict rules to prevent people being identified by mistake.

The Practice has to comply with court orders. If they require us to break confidentiality, we will resist this as strongly as legally possible.

What information does the Practice hold?

The Practice will maintain records of the patients name, address, date of birth, and any other relevant registration details that will enable the Practice to identify the appropriate patient.

Relevant medical information is recorded when patients are seen for treatment either at the Practice or by any other healthcare professional / service. Information is stored on the Practice computer system and medical records systems so that it can be traced more easily when needed. These systems are kept highly secure.

How may information about the Patient be used?

It will be used by the members of staff treating the Patient. Some information, such as name and address, may be used to make arrangements for care, such as to make an appointment. The Patient may be receiving care from other healthcare professionals as well as Cornerstone Surgery. To work together for the benefit of the Patient, the Practice may need to share some information. The Practice only does this with organisations providing care for the Patient and only when it is known it will be used under the same restrictions that the Practice applies to itself.

Anyone who receives information from the Practice is also under a legal duty to keep it confidential, unless the Patient agrees otherwise.

The Practice will regularly check that the care it offers is the best it can give by conducting patient surveys, audits, comparing against other Practices in the CCG and QoF points. Unless the Patient objects, medical records may be used by other medical professionals. If the Patient makes a complaint about their care, those investigating the complaint will be able to see those records. Sometimes the law requires doctors to pass on information, for example, to notify a birth or death, notify infectious diseases or in child protection cases. The Practice can also release information in certain circumstances for the protection of the public. For example, release information to help the investigation of violent crime but not of routine non-violent crime.

Signed: Dr Jean Margaret Sutton

Designation: Registered Manager / GP Partner
